

L

SAMSARA

CONTEMPRORY INDIAN GIN

L

SETTING THE CONTEXT

RESEARCH OBJECTIVE

01

To explore the emotional, symbolic, and social drivers influencing alcohol brand choice in the premium spirits category.

02

To understand how national pride, aspiration, and social validation interact in shaping consumer decisions.

03

To analyze occasion-based consumption behavior across different social settings.

04

To identify barriers to trial and adoption of Indian premium spirits.

05

To decode what makes a brand feel "world-class" in the consumer's mind.

EXPLORATORY SECONDARY RESEARCH

INDIA'S GIN MARKET

Small Base, High Growth, Premium-Led

MARKET SIZE

\$634.6M
(2024)

\$944.6M
(2033)

~4.18%
CAGR

PRICE SPLIT

Fastest
growing at
~8%
CAGR

CONSUMPTION

dominates at
~59%
of
consumption

Key Growth Drivers

01

Premiumization

Consumers are willing to pay more for better taste, storytelling, and experience

02

Global Exposure

Travel, social media, and international work culture shaping taste benchmarks

03

Urban Lifestyle Shifts

Increased socialising, dining out, and cocktail experimentation

04

Experience Economy

Alcohol is increasingly associated with celebration, identity, and self-expression

MARKET GEOGRAPHY

Alcohol consumption in India is **not evenly distributed geographically**

Premium and craft spirits demand is concentrated in:

1. **Metro cities**
2. **Tourist-driven states**
3. **Affluent urban clusters**

Western and Northern urban markets show higher **openness** to:

1. **New-age brands**
2. **Cocktail culture**
3. **Premium positioning**

Southern India contributes significantly to overall consumption but **shows uneven premium adoption, concentrated mainly in select metros.**

NORTH INDIA

Premium Growth Hub

Tier-2 cities surging, strong demand for premium whisky & spirits.

NORTHEAST INDIA

Distinct Preferences

Unique consumption patterns, potential for niche market

WEST INDIA

Mumbai & Pune: Metro Premium Hotspot

High cocktail culture adoption & openness to new-age brands

EAST INDIA

Developing Market

Growing interest, Opportunities in major hubs like Kolkata

GOA

Tourism Premium Zone

Highest per capita consumption, driven by tourists and relaxed regulations

SOUTH INDIA

(Karnataka/Bangalore)

Rapid premiumization in Bangalore, significant craft spirits market

SOUTH INDIA

(Tamil Nadu & others):

Contributes 58-60% IMFL sales, but premium adoption is uneven, mainly in select metros

CULTURAL & GENERATIONAL LENS: IMPORTED VS INDIAN SPIRITS

Legacy-Conditioned Consumers (40+)

★ Premium strongly associated with imported and widely recognized brands

★ Brand familiarity and legacy act as social safety mechanisms

★ Choices shaped by:

- Higher social risk aversion in visible settings
- Fear of negative judgment (“log kya kahenge”)

★ Imported brands reduce status anxiety by signaling:

- Established taste
- Economic stability
- Social appropriateness

★ Indian premium spirits face resistance not due to quality, but due to perceived social risk

Gen Z & Urban Millennials (18–35)

★ Lower social risk sensitivity in consumption decisions

★ Weaker bias toward imported brands

★ Premium evaluated through:

- Taste, smoothness, and experience
- Mixability and cocktail culture
- Authenticity and storytelling

★ Brand choice is more self-expressive than status-defensive

★ Familiar brands still preferred in:

- Gifting
- Hosting mixed or senior audiences
- High-visibility occasions

KEY MARKET PATTERNS

Premium Growth Is Concentrated, Not Widespread

- Demand is concentrated in select urban clusters and tourism-driven markets, rather than high-consumption regions.
- Markets with lower overall consumption volumes often show higher premium adoption.

Category Growth Is Driven by Trade-Up, Not New Users

- The spirits category is not expanding primarily through new drinkers.
- Growth is coming from existing consumers upgrading from mass to premium offerings.
- Consumers are reducing frequency but increasing per-occasion spend.

On-Trade Plays a Central Role in Premium Discovery

- Bars, lounges, hotels, and restaurants are the primary touchpoints for discovering premium and craft spirits.
- On-trade exposure enables:

First trial

Brand storytelling

Social validation

Imported Brands Remain Mental Benchmarks

- Imported spirits continue to dominate top-of-mind recall in premium segments.
- Foreign brands act as category anchors in consumer perception.
- Imported labels function as a reference standard for quality and status.

KEY MARKET PATTERNS

Indian Brand Acceptance Is Conditional

- Secondary research indicates growing openness towards Indian premium brands.
- However, acceptance is earned, not automatic.
- Consumers seek

Third-party validation

Proof of quality

Visibility in premium environments

Consumption Is Strongly Occasion-Led

- Alcohol consumption is shaped by context and audience, not routine habit.
- Spirit and brand choice varies by:

Social setting

Visibility of the occasion

Type of gathering

- Premium choices are more common in celebratory and social settings.

Geography Shapes Access, Trial, and Adoption

- State-level regulation and taxation create uneven access to premium spirits.
- Lower-tax and tourism-driven states encourage:

First trial

Brand storytelling

Social validation

- High-tax states limit trial despite demand potential.

Imported Brands Remain Mental Benchmarks

- Growth of gin correlates strongly with:

Cocktail menus

Mixology culture

Urban nightlife ecosystems

- Regions lacking cocktail infrastructure show slower gin adoption.

Visual & Symbolic Cues Drive First Impressions

- Growth of gin correlates strongly with:

Shelf visibility

Trial consideration

- Regions lacking cocktail infrastructure show slower gin adoption.

EXPLORATORY PRIMARY RESEARCH

RESPONDENT PROFILE

IN-DEPTH INTERVIEWS

Research Method

- In-depth Interviews (IDIs)
 - Semi-structured, 45–60 minutes per interview
- Transcripts

Consumption Profile

- Social & occasion-led drinkers
- Frequency: 1–4 times per month
- Primarily consume alcohol in:
 - ➔ House parties
 - ➔ Social gatherings
 - ➔ Celebrations & hosting occasions

Research Method

- Indian premium & craft spirits
- Imported premium spirits
- Mix of regular users, trial users, and category explorers

Indepth Interview

Key Insights

Occasion Sensitivity

"If it's just close friends, I'll try new Indian brands. With my boss, I won't take that risk."
— Prabhu, 28

- Low-stakes → experimentation allowed
- High-stakes → default to imported

Social Risk Aversion

"People judge by labels."
— Parichay, 28

- Familiar logos = no explanation needed
- Especially critical in gifting & corporate settings

Brand Recognition as Insurance

"Bombay Sapphire is safe. Everyone knows it."
— Pragati, 27

- Consumers optimise for **social safety**, not preference
- Recognisable" beats "better"

Taste-First

"If it tastes better, I don't care where it's from."
— Parichay, 28

- Taste, flavour innovation, experience > foreign vs Indian

Packaging as Social Currency

"That blue Bombay bottle, even if you don't drink gin, you know it."
— Pragati, 27

- Visual identity creates recall and legitimacy
- Bottle = conversation starter

Private Belief vs Public Behaviour Gap

"Indian gins are better value for money... but my friends still prefer international."
— Divya, 29

- Consumers intellectually trust Indian brands
- But emotionally hesitate in public

Peer Recommendation Dominance

"I tried it at a friend's place first. That's when I bought it." — Kanika, 26

- Discovery is **people-led**, not ad-led
- Friends, cousins, house parties = strongest triggers

Conditional National Pride

I won't buy it just because it's Indian. But if it's good, then I feel happier choosing Indian."
— Pragati, 27

- "Made in India" becomes a **bonus after quality is established**, not before

RESPONDENT PROFILE

SURVEYS

Research Method

- In-depth consumer survey
- Total responses: 108
- Mix of regular users, trial users, and category explorers
- Focused on Indian premium & craft spirits consumers

Consumption Profile

- Alcohol has been part of life for several years for most respondents
- Strong role of occasion-based drinking:
 1. Hosting
 2. Social gatherings
 3. Celebrations
 4. Private vs public settings influence brand choice
- Consumers often:
 1. Try new spirits at bars first
 2. Associate premium venues, awards, and placement with quality

CONFIRMATORY ANALYSIS

Colonial Hangover Effect

When trying a new brand, I prefer a foreign brand spirit over Indian spirit

- There's a persistent psychological bias in the Indian premium spirits market that foreign = better quality, sophistication, and status.

Social Validation

I Choose Based on Social Context & What Others Think

- When stakes are high, these consumers default to imported brands as a "safe choice" that won't invite criticism. They feel if they choose an Indian spirit, they'll need to "explain" their choice.

Experiential Discovery

I Discover Brands Through Experiences, Not Stores

- These consumers need to encounter brands in social/experiential contexts before they'll consider purchase. They're not actively browsing stores looking for new brands

WHAT THE DATA SHOWS

Quality-First Mindset

Origin Doesn't Matter - Quality Does

- Consumers use actual product attributes (smoothness, taste, value) rather than brand origin as decision criteria. This suggests higher category involvement and expertise.

Premium Context

I Need Environmental Cues to ascertain Premium Quality

- Being served at high-end venues becomes a quality certificate. If Samsara is available at premium hotels, restaurants, and bars, it gains credibility with this segment.

WHAT THE RELATIONSHIP IN THE DATA REVEALED:

Samsara's 'Premium' wall

Brand recall declines as consumption contexts shift to more premium and exclusive context

WHAT THIS MEANS FOR US

01 **The Heritage Gap**

In formal or ultra-exclusive settings, consumers default to brands with a deep "distilling pedigree." Icons like Hendrick's occupy the mental space for formal occasions, making it harder for a contemporary brand to break through the "White Glove" barrier.

02 **The Democratic Craft Advantage**

Samsara is the "Smart Choice" for the new generation of gin drinkers. It thrives on the shift away from stuffy, gatekept drinking toward high-quality, inclusive experiences that focus on the liquid, not the lineage.

03 **Democratized Luxury**

The brand is a winner in the "inclusive premium" trend, appealing to discerning consumers who prioritise quality over gatekept social status.

STRATEGIC RECOMMENDATIONS

01 **Own the "Elevated Everyday"**

Focus marketing on high-quality but relatable moments, rooftop bars and boutique hotels, rather than "fantasy" luxury.

02 **Avoid Over-Premiumization**

Resist trying to make the brand too premium. Over-indexing on exclusivity may actually alienate Samsara's core consumer base.

03 **Lean into Smart Luxury**

Position the brand as the choice for the modern consumer who appreciates sophistication but rejects pretension

WHAT THE RELATIONSHIP IN THE DATA REVEALED:

The Trust Transfer

Peer and Expert Endorsements are Critical Safety Signals for brand recall

WHAT THIS MEANS FOR US

01 **The "Vibe" Anchor**

Brand recall is tied to community belonging. Consumers remember Samsara when they see it associated with people they admire, making it a badge of modern, sophisticated taste.

02 **Amplification Loop**

Because gin is a social spirit (shared, gifted, displayed), every positive peer recommendation creates a "ripple effect" that significantly boosts mental availability

STRATEGIC RECOMMENDATIONS

01 **Always feature it in the "Act of Recommendation"**

Visually prioritise the pour, the shared toast, or the bottle placed centre-stage at a table of friends. This reinforces the social validation driver

02 **The Social Circle**

Position Samsara as the catalyst for the conversation, not just a bystander to it. This is shown via collaborating with different micro influencers for their house parties

THE MOST FAVORABLE CLUSTER

Age Drinking Since Location
25-29 **5-10 years** **Delhi NCR**

Expenditure Schema Node
<Rs. 2000 **Premium**

Why this ICP fits

- Highest Samsara recall (3.22)
- Lowest imported preference (2.67)
- Highest claimed neutrality (4.02)
- Highest low-risk trial (3.59)

PULKITA SRIVASTAVA

Age Drinking Since Location
50+ **10+ years** **Tamil Nadu**

Expenditure Schema Node
Rs. 8000+ **Premium**

- Create-your-own-gin workshops
- Distillery tours & flagship experience centres (long-term)

High-status placements

- Weddings (gin shots/cocktail bars)
- Cultural & lifestyle events with visible brand presence

GLOBAL STRATEGY

Discovery is people-led, not ad-led + Conditional national pride: Made in India becomes bonus after quality is established

The narrative we should try to build

"We're not asking you to choose Indian over imported. We're showing you that when Indian is this good, choosing it becomes a point of pride, not compromise."

UAE & TRAVEL RETAIL

(85% of International Business)

Premium Indian Dining Partnerships

- Co-create signature cocktails for premium Indian restaurants
- Menu storytelling that connects cuisine regionality to spirit craft

India Spitrits Fusion

- Joint content series for art and textile
- Collaborate with contemporary Indian galleries in Dubai for exhibition opening receptions

Gifting

- Take India Home messaging for diaspora
- Origin story cards in international packs
- Small format cards on awards

Content Creators

- Partner with Dubai-based NRI influencers who host intimate dinner gatherings
- Focus on Food, Lifestyle, Art and fashion influencers

PHASED ROLLOUT FOR SAṂSĀRA

PHASE 1

BUILD VISIBILITY & CONFIDENCE

(0–6 months)

FOCUS CHANNELS

- Digital & Content Ecosystem
- Selective On-Trade (premium bars & hotels)

KEY ACTIONS

- Always-on Instagram & YouTube storytelling
- Mixologist-led influencer collaborations
- QR-led brand story, awards & serving cues
- Bartender training & named signature cocktails
- Initial luxury hotel partnerships

OUTCOMES

- Reduces social risk anxiety
- Establishes SAṂSĀRA as a credible premium choice

PHASE 2

DRIVE TRIAL & HABIT FORMATION

(6–18 months)

FOCUS CHANNELS

- Expanded On-Trade Activation
- Events & Experiences

KEY ACTIONS

- Signature cocktails across cities
- Mixology masterclasses & tastings
- "SAṂSĀRA Botanical Gardens" pop-ups
- Create-your-own-gin workshops
- Wedding & social event placements
- Airline partnerships (Business/First Class)

OUTCOMES

- Normalises Indian premium spirits in social settings
- Converts trial into repeat consumption

PHASE 3

SCALE PRESTIGE & OWN OCCASIONS

(18–36 months)

FOCUS CHANNELS

- Cultural placement & flagship experiences
- Long-term hospitality & travel partnerships

KEY ACTIONS

- Flagship distillery experience centre
- Travel retail expansion & exclusive editions
- Hotel-exclusive variants & residencies
- Gin × Art / Music / Fashion cultural IPs
- Large-format wedding & corporate showcases

OUTCOMES

- SAṂSĀRA becomes a reference Indian luxury spirits brand
- Shifts from trial-led to reputation-led growth

APPENDIX

L

BUSINESS OBJECTIVE

- To understand how premium Indian consumers perceive homegrown spirits versus imported alternatives at similar price points.
- To identify where and why perception gaps exist, despite improvements in quality, packaging, and global recognition of Indian craft spirits.
- To uncover consumption moments and social contexts where Indian brands are preferred — and where imported brands continue to dominate.
- To identify strategic opportunities for SAMSĀRA to strengthen its position as a modern Indian luxury spirits brand.

DISCUSSION GUIDE

DISCUSSION GUIDE

[HERE](#)

01. Open-ended Questions

Broad questions like “How do you decide between Indian and imported spirits?” were asked to encourage participants to speak freely about their preferences, beliefs, and real-life decision-making without being led.

02. Probing Questions

Follow-up questions like “What makes you trust imported brands more?” or “When do you feel safe choosing an Indian spirit?” were used to dig deeper into hidden drivers such as status anxiety, pride, risk aversion, and trust cues.

03. Categorized Topics

The guide was structured into clear themes such as Occasion-based drinking, Status signalling, Quality perception, Authenticity, Price–value evaluation, and Discovery channels, ensuring complete coverage of factors shaping spirits choice.

04. Scenario-Based Queries

Real-life scenarios like “You’re gifting alcohol to your boss/client—what would you choose and why?” were used to capture context-specific behavior and identify moments where Indian brands win vs where imported brands dominate.

05. Problem Identification

Questions like “What stops you from choosing Indian premium spirits more often?” helped identify key barriers such as low awareness, perceived inconsistency, fear of judgment, and weak premium cues.

06. Future-Oriented Questions

Forward-looking prompts like “What would make you switch from imported to Indian premium spirits?” were included to uncover conversion triggers, unmet needs, and opportunities for category building.

07. Categorized Topics

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Donec vitae elit sed est dapibus mattis est nisi arcu mauris diam.

08. Word Association Question

Neutral terms such as “Indian craft spirits,” “Imported alcohol,” “Luxury gin,” and “Made in India” were used to capture spontaneous perceptions and emotional associations that shape brand image.

09. Sentence Completion Questions

Incomplete prompts like “I choose imported spirits when...” and “I would trust Indian spirits more if...” were used to get honest, instinctive responses and reveal deeper motivations.

QUANTITATIVE SURVEY

QUANTITATIVE SURVEY

Question Formats Used

- Likert scales (agreement, comfort, confidence)
- Forced trade-offs (taste vs brand vs origin)
- Scenario-based questions (hosting, gifting, social events)

Indian or international, how do you really decide?

When trying a new brand, I prefer a foreign brand spirit (alcohol) over Indian spirit (alcohol) *

1 2 3 4 5

Strongly disagree ☐ ☐ ☐ ☐ ☐ Strongly Agree

If the price of the spirits is the same, the origin of the spirit (Indian or international) does not matter to me *

1 2 3 4 5

Strongly disagree ☐ ☐ ☐ ☐ ☐ Strongly Agree

If the smoothness of the spirits is the same, the origin of the spirit (Indian or international) does not matter to me *

1 2 3 4 5

Strongly disagree ☐ ☐ ☐ ☐ ☐ Strongly Agree

I prefer serving imported spirits when I am hosting people I am not very familiar *

[Check the form here](#)

01. Consumption Context

Frequency, category preference, social vs private consumption

02. Occasion-Based Choice

Different brand behavior across hosting, gifting, casual drinking

03. Perception & Evaluation

Taste, quality, packaging, price, origin cues

04. Social & Psychological Drivers

Comfort, judgment anxiety, need for "safe" brands

05. Future Intent & Openness

Willingness to try / serve Indian premium spirits going forward

REGRESSION ANALYSIS

Model Summary

[Copy](#) [Interpretation](#)

R	R ²	Adjusted R ²	Standard error of the estimate
0.74	0.54	0.52	0.83

Significant Indicators

Contextual Premiumness ($\beta = -0.31, p < .001$)

Samsara might be better recalled in moderately premium contexts rather than ultra-premium ones.

Social Validation ($\beta = 0.33, p < .001$)

Word-of-mouth and community endorsement are crucial drivers for Samsara. The brand benefits from social credibility

Model	Unstandard. Coef. B	Standard. Coef. Beta	Std. Error	t	p	95% CI for B lower bound	95% CI for B upper bound
Constant	1.00						
Imported Preference	0.00	0.00	0.00	0.00	0.00		
Claimed Neutrality	0.00	0.00	0.00	0.00	0.00		
Contextual Premiumness	-0.31	-0.31	0.05	-6.00	<.001	-0.41	-0.21
Low Risk Trial	0.00	0.00	0.00	0.00	0.00		
Social Validation	0.33	0.33	0.05	6.00	<.001	0.23	0.43

Dependent Variable - Samsara comes to my mind when I think of premium spirits

What this means?

- Messaging should emphasize that Samsara represents "smart luxury" or "modern premium" - for discerning consumers who appreciate quality but reject pretension.
- Premium alcohol purchases are inherently social decisions. Unlike many product categories, spirits are rarely consumed alone, they're shared at gatherings, gifted to others, ordered in public settings, and displayed in homes. Social validation matters because these products communicate something about the purchaser's taste, sophistication, and social awareness to others.
- The power of social validation suggests that satisfied customers become brand ambassadors. When someone has a positive Samsara experience and shares it with their network, it creates ripple effects that significantly boost brand recall among that social circle.
